Department of Natural Resources IKING WATER & GWHigh Capacity, School or Wastewater Treatment Plant Well Approval Application

Form 3300-256 (R 7/05)

Page 1 of 6

Notice: Prior department approval is required for the construction, reconstruction or operation of a high capacity well or system of high capacity wells, a school well or a wastewater treatment plant well in accordance with Section NR 812.09(4)(a), Wisconsin Administrative Code. Personally identifiable information collected on this form, including such data as your name, address and phone number, will be used for management of department programs and is unlikely to be used for other purposes. This information will be addressable under Wisconsin's Open Records Laws, ss. 19.32 - 19.39, Wis. Stats.

Use this form to request an approval for installation of a well or wells on a high capacity property, seek approval to make other changes to a high capacity property or to modify a well on a high capacity property, as required by NR 812.09(4)(a), Wisconsin Administrative Code. Refer to definitions of high capacity well, high capacity property and high capacity well system on page 5.

This form is not intended to be used when seeking approval for construction or modification of wells serving water systems regulated under ch. NR 811, Wis. Adm. Code. Any water system serving 7 or more homes, 10 or more mobile homes, 10 or more apartments, 10 or more condominiums, or 10 or more duplexes is regulated under ch. NR 811, Wis. Adm. Code. See NR 811.01, Wis. Adm. Code for applicability requirements.

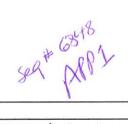

Applicant Information										
Application Prepared By (Name and Title)			Company							
Alan Hansen, General Manager		Kimmes-	Bauer Well Drilling, In	IC.						
Street Address		City		State	ZIP Code					
22100 Lillehei Avenue			js .	MN	55033					
Telephone Number	Fax Number		E-Mail Address							
(651) 437-1973	(651) 437-6394		kimmesbauer@gma	ail.com						
Property Ownership Information										
Property owner, if different than applicant (Name of Person and Title)	Company								
John Creaser										
Street Address		City		State	ZIP Code					
N2215 510th Street		Menomo	onie	WI	54751					
Telephone Number	Fax Number		E-Mail Address							
715-495-6882										
Well Operator Information										
Well operator if different than owner (Name	e of Person and Title)	Company								
Street Address		City		State	ZIP Code					
Telephone Number	Fax Number		E-Mail Address		•					
Property Information										
Enter the High Capacity Well File Number be	elow if the property is already a	a high capacity	property. If the property is r	ot designa	ated as a high capacity					
property at the time of application, enter "NO or use the compact disk of departmental well										
"Location" section. File number format is as f			well classification) - (1 to 4 d	igits for as	signed property no.).					
County	Town		High Capacity	Well File I	No.					
Dunn		69432 Go	ss Well							
Submittal Purpose										
Check all that apply:										
Install one or more new wells with a	a capacity greater than 70 g	allons per m	inute.							
Install one or more new wells with a	a capacity less than 70 gallo	ons per minu	te on a high capacity prop	perty.						
Replace one or more wells with a c	apacity greater than 70 gall	lons per minu	ute.							
Replace one or more wells with a c	apacity less than 70 gallons	s per minute	on a high capacity prope	rty.						
Reconstruct one or more wells with	a capacity greater than 70	gallons per i	minute.							
Reconstruct one or more wells with	a capacity less than 70 gal	llons per min	ute on a high capacity pr	operty.						
☐ Increase pumping rate in one or mo	ore wells to a rate greater th	an previousl	y approved.							
Request continued operation of hig	h capacity wells after a cha	nge in owner	rship. (No application fee	required	.)					
Renew a previous approval that has	s expired.									
Well (or wells) will serve a school o	r wastewater treatment plar	nt. See defin	itions on page 5.							
Other, explain										

Site	Statu	is Information
and t	he in	the site status using the Internet or the compact disk of departmental well data that is issued to drillers and pump installers formation supplied by the property owner. Internet address is dnr.wi.gov/org/water/dwg/dws.htm . Enter YES or NO for each owing questions.
YES		Has the property boundary changed since the most recent high capacity well approval was issued? If the property is not yet a high capacity property, check NO.
	X	Has there been a change in well ownership since the last approval was written? If YES, name of current owner: Date of purchase:
	X	Has there been a change in well operator since the last approval was written? If YES, name of current operator: Date of change:
	X	Will a proposed well be connected to a plumbing system that is supplied by other sources (other wells, municipal supply, etc.)? If YES, include a schematic drawing showing backflow protection.
	X	Is a proposed well within 1,200 feet of a landfill? Determine if there are any landfills nearby, using the well information compact disk FIND feature. Enter the township, range and section of the well location. If the well is near a section line, also check the adjacent section or sections. If YES, list the landfill site ID Number: OR Landfill location: (Township/Range/Section)
	X	Is a proposed well on a property that has a contaminated site? If YES, list the BRRTS (Bureau for Remediation and Redevelopment Tracking System) Number here and specify if the site is open or closed:
	X	Is a proposed well on a property that has a groundwater use restriction recorded on the deed? If YES, list the BRRTS number, as assigned to the contaminated site by the DNR remediation and redevelopment program:
	X	Is a proposed well on a property that is listed on the department's registry of closed remediation sites for a groundwater use restriction? See compact disk or internet at maps.dnr.state.wi.us/imf/dnrimf.jsp?site=brrts . If YES, list the BRRTS Number here:
	X	Is a proposed well to be used for a public water supply system that serves 25 or more people? See definition of a "public water system" in the definitions section on page 5.
	X	Is a proposed well to be installed within a special casing area? Refer to the list of special casing areas that is published by the department and/or contact the regional DNR office.
	X	Has the number of wells or pumping capacity in an existing well increased since the most recent high capacity well approval was issued?
	X	Has the number of wells decreased since the most recent high capacity well approval? If the property is not yet a high capacity property, check NO.
	X	Is a non-pressurized storage vessel (i.e. reservoir) other than a pond proposed or in use?
	X	Will the well discharge directly to a storage pond?
	X	Is a pressurized tank with a capacity greater than 1,000 gallons proposed or in use?
	X	Is a proposed well within 1,200 feet of a quarry?
	X	Is a proposed well located in a floodplain or floodway?
	X	Are any existing well installations on the high capacity property out of compliance with Chapter NR 812, Wisconsin Administrative Code?
	X	Will the well be used as a source of bottled water?

Are you seeking a variance to construct a well that has a capacity of less than 70 gallons per minute to low capacity well construction standards?

☐ X Is the property served by a community water system?

Existing Well Information

Required Attachments

- Attach one of the maps described in A. or B., below. Plot the existing and proposed well locations on the map. For wells that have a Wisconsin Unique Well Number or a Permanent High Capacity Well Number, plot the well locations with one of those numbers.
 - A. Copy of a plat map with the property boundary clearly shown. If the property is contiguous with properties owned by the same owner in another township, include a copy of that township map too, showing the property boundaries. If the property owner listed on the plat map is different from the current owner, list the date or dates, that the current property owner purchased the property on the map.
 - B. Map of the property prepared by a licensed land surveyor and the property description as described by the surveyor.
- 2. Sketch map showing all of the following that are planned or exist within 300 feet of each proposed well: proposed well location; other wells; property boundary; wetlands; potential contaminant sources (septic tank and drainfield, petroleum storage tanks, sewer lines, etc.); buildings and north arrow. If no pertinent features to map within 300 feet of the proposed well, for example an irrigation well in the middle of a field, state that on the property map listed above and plot the well locations on that map.
- Any well construction records available for existing wells on the property. Do not attach any well construction records for wells that are not on the property. If a Wisconsin Unique Well Number has not been assigned, write a well name or site well number on the record that correlates to the well name or number plotted on the maps.
- 4. For proposed wells with a capacity greater than 400 gallons per minute, include the performance curve or performance table that is provided by the pump manufacturer. If the pump will be a lineshaft turbine, provide a curve with the same rpm as the motor under full load and list the motor horsepower.
- 5. If more than one well is connected to a common plumbing system, also provide a schematic drawing of the system showing method of preventing backflow. This sketch must include the well discharge (pitless, over top of casing sanitary seal); the water line from the well; pressure tanks; sampling faucets; check valves; backflow preventers; air gaps; manually operated valves; water meters; pressure switches for pumps; and any other pertinent fittings. This schematic drawing must also identify which of these components are buried or above ground. If there is more than one check valve within the well casing, include in-well check valves on the schematic.
- If reconstruction of an existing well is proposed, include a diagram of the current well construction and a diagram of the proposed construction.
- 7. If the application is for a high capacity well or wells, a \$500.00 check payable to the Department of Natural Resources, unless the application is only for continued operation after a change of ownership.

Certification and Applicant Signatures

If the application requests a variance for a well within 1,200 feet of a landfill, a well on a property with a groundwater use restriction, or any other variance to NR 812, Wis. Adm. Code, the property owner must sign the application. If the well operator will install a well on property that he or she does not own, the property owner must also sign the application. Otherwise, an agent of the owner may sign the application.

Unsigned and incomplete applications will not be approved.

By signing this form, the person signing this application certifies that to the best of his or her knowledge, all existing well installations on the property comply with ch. NR 812, Wis. Adm. Code. The person also certifies that to the best of his or her knowledge, all information in the application is accurate and correct.

Definitions from Wisconsin Administrative Codes		

"High capacity well system" means one or more wells, drillholes or mine shafts used or to be used to withdraw water for any purpose on one property, if the total pumping or flowing capacity of all wells, drillholes or mine shafts on one property is 70 or more gallons per minute based on the pump curve at the lowest system pressure setting, or based on the flow rate. [NR 812.07(53)]

"Public water system" means a system for the provision to the public of piped water for human consumptions if such system has at least 15 service connections or regularly serves an average of at least 25 Individuals daily at least 60 days per year. A public water system is either a community water system or a non-community water system. Such system includes: (a) Any collection, treatment, storage, and distribution facilities under control of the operator of such system and used primarily in connection with such system, and (b) Any collection or pretreatment storage facilities not under such control which are used primarily in connection with such system. [NR 812.07(80)]

"School" means a public or private educational facility in which a program of educational instruction is provided to children in any grade or grades from kindergarten through the 12th grade. Water systems serving athletic fields, school forests, environmental centers, home-based schools, day-care centers and Sunday schools are not school water systems. [NR 812.07(94)]

"Wastewater treatment plant" means any facility provided for the treatment of sanitary or industrial wastewater or both. The following types of facilities are excluded: (a) Facilities defined as private sewage systems in s. 145.01(12), Stats. (b) Pretreatment facilities from which effluent is directed to a public sewer system for treatment. (c) Industrial wastewater treatment facilities which consist solely of a land disposal system. [NR 114.03(14)]

[&]quot;High capacity well" means a well constructed on a high capacity property. [NR 812.07(51)]

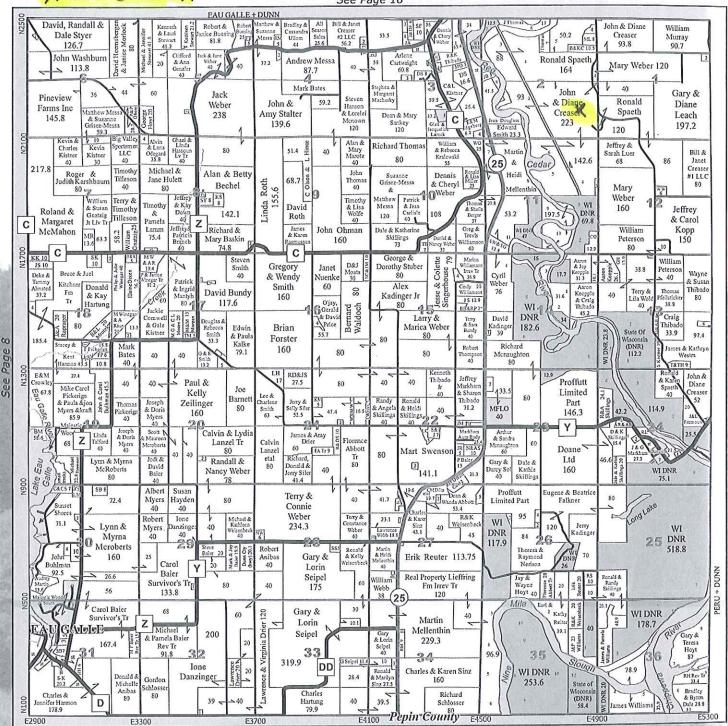

[&]quot;High capacity property" means one property on which a high capacity well system exists or is to be constructed. [NR 812.07(52)]
